IMPORTANT NOTE:

To prevent fire hazard, please use only the included power cord. Do not disassemble the machine.
If you have any issues, please contact us immediately.

1. Technical Details

Model	Dimension (mm)	Voltage	Power	Coverage
AS650 Wi-Fi	260*200*95	12 V	10 W	150m ² ; 450m ³

2. Accessories

Please check the completeness of your delivery. If any of the parts listed below is missing or damaged, please contact us.

- AromaStreamer®
- Soft tube
- Scent bottle (if ordered)
- Wall mounting rail
- Adapter (for hose connection)
- Power adapter

(DVE Rong Xing Wang Ltd, 3rd floor building
No2, The second industry, Pinshan new area,
Shenzhen)

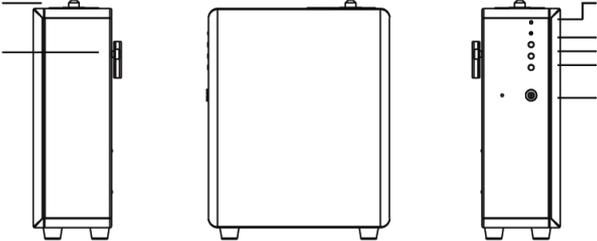

3. Places of application

Hotels, Meeting Rooms, Malls, Exhibition Halls, Brand retail stores, Bars, SPA's, Business places and wherever you want to enjoy a pleasant scent experience.

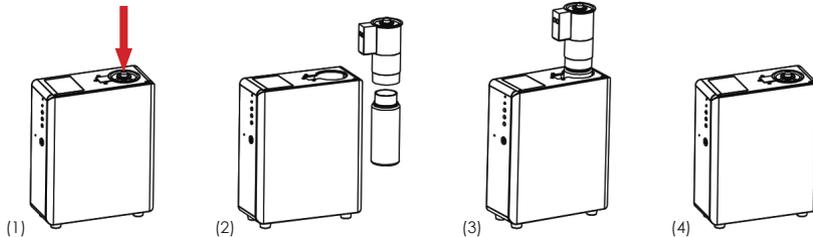

Scent marketing with your AromaStreamer® knows (almost) no limits.

4. Control elements

5. Initial start-up/Change of scent cartridge

Please remove the atomization unit by pulling it straight up.
Please use the handle (see red arrow) (1).

Initial start-up:

Screw the supplied scent bottle carefully into the atomization unit (2).

Change of scent cartridge:

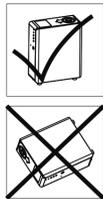

Unscrew the empty scent cartridge and screw the new scent cartridge into the nebulization unit (2).

Take the nebulization unit and put it vertically into the AromaStreamer® (3).

IMPORTANT NOTES:

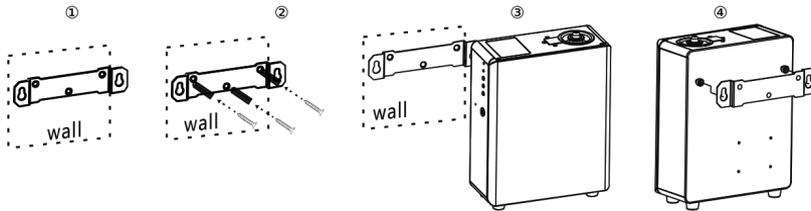

After the transport of the diffuser, the white seal inside of the nebulization unit may have detached/fallen down into the housing. (The seal is normally located exactly at the point, where the screwed-in scent bottle will touch the unit). In this case, please put the seal back in its place before using the diffuser.

After installation, please keep the machine vertical. Tilt or lay down may cause scent overflow. Liquid overflow may cause damages to the machine.

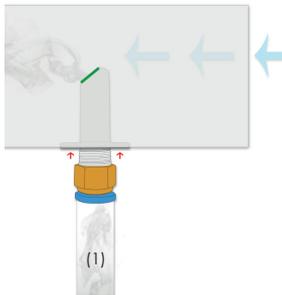

6. Installation - Wall mounting

Take out the wall bracket as well as the screws and dowels from the box. Fix the bracket as shown (2) on the wall. Now, hang the AromaStreamer® into the bracket.

7. Connection to air conditioning and/or ventilation system

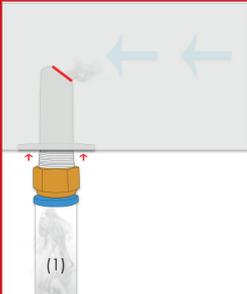

RIGHT APPLICATION

Only with continuous air flow & lateral supply air

1. Connect the adapter hose (1) with the light blue connector at the adapter.
2. Assemble the adapter with 2 screws at the 2 provided markings (see red arrows) to your air duct.
3. **IMPORTANT:** Be sure that the opening of the adapter is directed with the flat side and with the opening to the direction of the air flow. (see green mark)

7. Connection to air conditioning and/or ventilation system

WRONG APPLICATION

3. FALSE IF: You assemble the red marked surface against the direction of the air flow. Then, the scent will not have the desired effect and will be pressed back into the scent device.

IMPORTANT NOTE:
Keep in mind that filters in the ventilation channel can decrease scent intensity. Depending on cooling and warming a scent can change and lead to residuals in the ventilation channel.

(1)

8. Power connection/Power on/off

Connect the AromaStreamer® to the power source and you will hear a short beep. Your device is active now.

- With the help of the app you can turn the device on or off. Set the switch button to on or off (only possible after registration and configuration).
- If you remove the power adapter, the device is turned off.
- After 1 minute of inactivity the device locks automatically
 - ↳ no function of the buttons
- Press and hold **F + E** for 3 seconds for manual locking and unlocking.

IMPORTANT NOTE:

If you switch off the device using the app, the AromaStreamer and the app have to be connected.

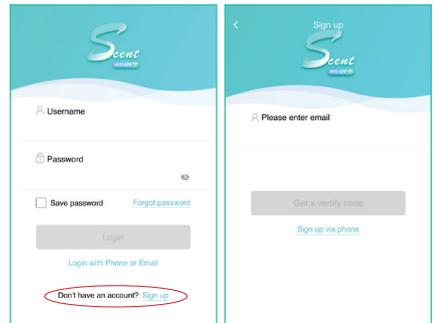

9. App-Registration

First go to your App Store/Google Play Store and install the app „Scent-WIFI“. After successfully downloading and installing it, you can open the app and start the registration process. You can choose between an email registration or a mobile registration.

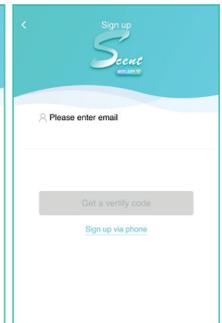

9.1 E-mail registration:

- Press **Don't have an account? Sign up** at the start screen (A)
- **Please enter E-Mail:** Enter your email address (B)
- After sending the e-mail address you will receive the activation code (verify code) by e-mail to your mailbox, from admin@myscentwifi.com (may take a few minutes, check SPAM mailbox if necessary).
- Now enter the following information (C):
 - ↳ Username*
 - ↳ Password (assign your own password)
 - ↳ Enter password again (Confirm password)
 - ↳ Enter verify code (Verification Code)
- Press **Sign up** (C)
- Now enter into the main menu
 - ↳ log in with your username and your password
 - ↳ Confirm the entry with **Login** (D)

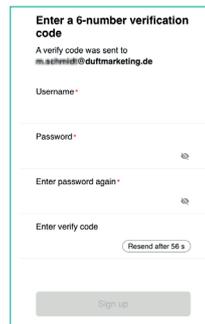

***Username: use your e-mail address as username**

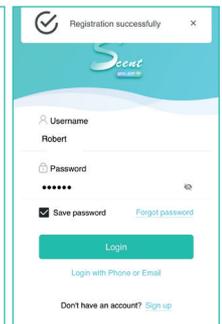

(A)

(B)

(C)

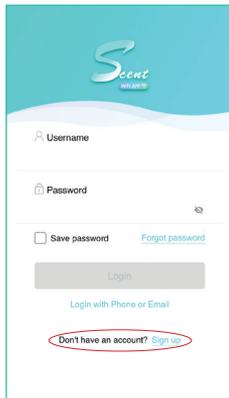

(D)

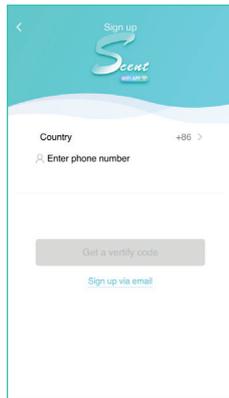

9. App-Registration

9.2 Mobile registration:

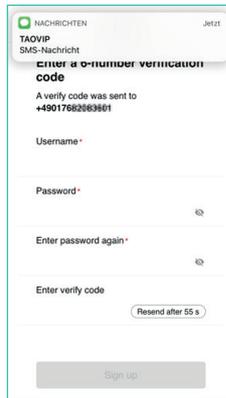

- On the start screen of the app, press **Don't have an account? Sign up** (E).
- **Country:** Select country and **Phone:** Enter your mobile phone number required (F)
- After sending, you will receive a 6-digit activation code from TAOVIP (G) via SMS.
- Now enter the following information (H):
 - ↳ Username
 - ↳ Password (assign your own password)
 - ↳ Enter password again (Confirm password)
 - ↳ Enter verify code (Verification Code)
- Press **Sign up** (H)
- Now enter into the main menu
 - ↳ login with your username and password
 - ↳ Confirm with **Login**

10. Device configuration

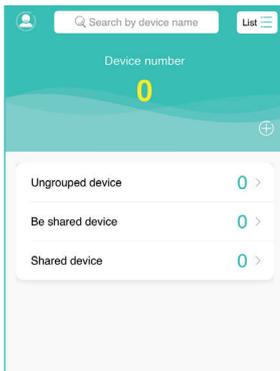

IMPORTANT: Before configuration make sure that Your device (smartphone, tablet,...) is at the same Wi-Fi network as the AromaStreamer® will be (4+5) . Unlock the device by holding down E + F until you hear a beep. Then press C for a short moment (do not hold down). Now the AromaStreamer® should blink 2x blue and 2x red.

- Open the Scent Wifi app.
- To add a new device, press + (right side of the app) and then **configure device** (2).
- You reach the „Search device“ overview.

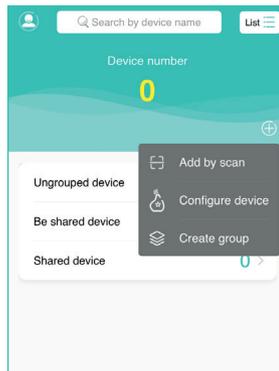

10.1. Configure

IMPORTANT: Move the AromaStreamer® as close as possible to your Wi-Fi router.

- Make sure that the upper lamp on the right side blinks twice blue and twice red
- Now press **Next Step**

(1)

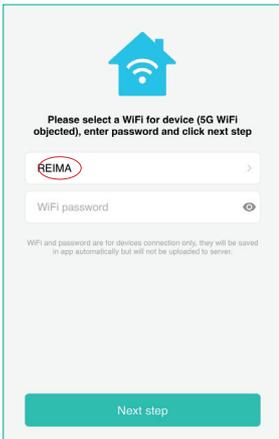

(2)

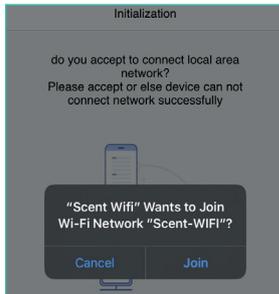

(3)

10. Device configuration

(5)

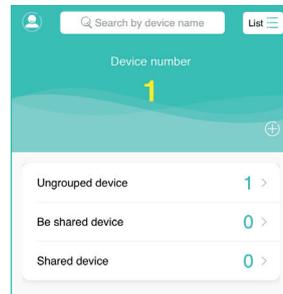

(6)

(7)

(8)

(9)

- Now select the desired Wi-Fi and enter the corresponding Wi-Fi password (5).
- Now press [Next Step](#).
- Follow the instructions in the app. (6-8)
- Your desired AromaStreamer® is now in your device list (Ungrouped device) (6).

11. AromaStreamer® settings - via App

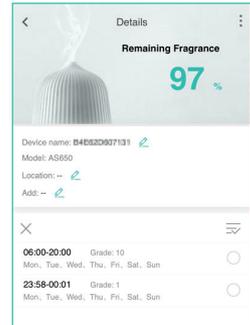

Click on the relevant AromaStreamer® to open the settings menu.

IMPORTANT: If the fill level indicator (during first start-up) does not show right, the AromaStreamer® must be recalibrated.

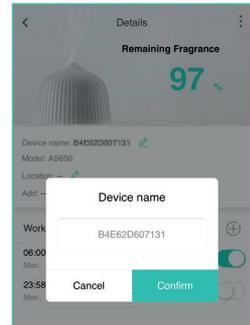

- ↳ Remove nebulization unit (bottle can stay)
- ↳ Press **E** until it beeps, release button **E**, wait until it beeps again
- ↳ Reinsert unit with screwed-in bottle
- ↳ Press **F** until beeps, release button
- ↳ Wait until it beeps
- ↳ Calibration successful

Now you can rename your device(s) or enter information which are important to you (10). Adjust your device how you want to. Confirm your entries with **Confirm**.

With the „+“ button you can define up to five different settings for operating times and scenting individually. Set different days or turn off the device during the lunch break. You can configure Your AromaStreamer completely as you want to (11).

(10)

(11)

IMPORTANT NOTE:
Intensity level 1: lowest level
Intensity level 20: highest level

11. AromaStreamer® settings - via App

The start time: desired start time

The end of time: desired end time

Set the active and inactive days (12).

Green field: active days

white field: inactive days

Grade (*intensity level*):

Set the intensity level. You can select from Level 1 to 20.

✓ (Save):

Confirm your settings with ✓ (Save) in the upper right corner and you will return to the settings menu.

Using the right buttons (13), you can flexibly switch the times active and inactive.

Green: active

White: inactive

You can change the setting ranges at any time. and add new ones (13).

IMPORTANT NOTE:

Delete with iOS: Hold down the line, activate the check mark on the right side, and then press „delete“.

Delete with Android: Keep the desired line pressed and confirm the deletion with „Delete“.

11. AromaStreamer® settings - via App

- Menu 
- Language (language choice between Chinese & English)
- Feedback
- My center - Logout
 - Change of personal password possible
- About us (current app version)

If you do not want to change anything on your AromaStreamer®, close the app.
Now the device scents your rooms according to your wishes.

12. Optional usage with adapter

The AromaStreamer® 650 Wi-Fi can also be connected to a flexible tube, so it will be possible to place it invisibly, for example behind a counter. Therefore, screw the supplied adapter into the nebulization unit on top of the device.

Then click the tube into the adapter and guide the tube into the room or the area that should be fragranced or into your HVAC or ventilation channel. Please notice, that the tube has to be laid upwards.

Do not lay the tube downwards or undulating. In this case liquid can drop down and your fragrance device may not work properly. Furthermore, please lay the tube in the shortest way possible. The tube can be cut off at any point with scissors. The tube should have a maximum length of 50 cm. If you have any further questions please contact our technical support team.

ATTENTION:

The AromaStreamer® 650 Wi-Fi contains a silencer. Upon delivery of the scent device the silencer is already screwed into the scent outlet (upper left side of the machine). If you want to use the machine with adapter and tube the silencer needs to be removed.

13. Cleaning of your AromaStreamer®

We recommend a cleaning of the device in the following cases:

1. General cleaning with every scent change.
2. Cleaning when the nebulization becomes lower.

Cleaning steps:

1. Fill a small amount of the system cleaner into an empty scent bottle and screw it into the nebulization unit. Now run your AromaStreamer® for about 15 minutes on the highest intensity level.
2. You can use the device directly after cleaning.

Shipping / Return:

1. Please always use the original box to ship your AromaStreamer®.
2. Please make sure there is no scent bottle located in the device. If you are shipping a scent bottle, please close it properly.

14. After-sales service

Our service for you: If you have any questions please contact us shortly. Our technical support will help you.
